### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The allowability resides in the overall structure of the device as recited in sole independent claim 13, and at least in part because claim 13 recites: "A device for...a communication system that comprises a housing...comprising: a connection area...partially accessible from outside of the housing; a housing cover comprised of a first hood and a cover portion, the first hood having at least one aperture and at least one attachment mechanism, the cover portion having at least one first guide and at least one clip connection mechanism...to releasably retain the at least one attachment mechanism...a base housing part; and a printed circuit board arranged between the base housing part and the cover portion...having an extension area...at least one first plug-in device...to connect to a first extension printed circuit board; the at least one first plug-in device comprising a first plug-in device, the first plug-in device...mechanically connected to a first extension printed circuit board, the first extension circuit board at least partially supported on the at least one first guide attached to the cover portion; the first extension circuit board having at least one second plug-in device that is positioned in the at least one aperture when the first hood is connected to the cover portion, the at least one second plug-in device...configured for connection of system terminations; and the cover portion...configured to clamp at least a portion of the printed circuit board against the base housing part when the cover portion is attached to the base housing part..." (emphasis added). The aforementioned limitations, in combination with all

remaining limitations of claim 13, are believed to render the claim and all claims dependent therefrom (claims 14-28 and 30-31) patentable over the art of record.

None of the references cited during prosecution of the instant application, including the newly cited references (e.g. Naff (US 3684925)...Cole et al. (US 6322375)) either taken alone or in combination, is believed to render the present invention unpatentable as claimed.

Furthermore, the Examiner has performed invention and assignee name searches for possible double patenting issues. No documents with conflicting claims have been identified.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRADLEY H. THOMAS whose telephone number is (571)272-9089. The examiner can normally be reached on 7:00am - 3:30pm (Eastern).
